

Tree Warden Report October 2024

Not much tree work has been done recently due to the weather and holidays.

Ongoing Low farm wood work will be started in November.

The TPO applications have been monitored and there is a plan to start ongoing maintenance on the areas the BTWN are responsible for soon.

The TW's effort has been concentrated the allotment water installation starting on the 21st. A method statement and risk assessments for the team have been completed and sand ordered, along with the 360 digger.

Is it expected that the French drains at South West corner of CP will be completed at the same time as the allotment standpipes?

The weather has not been great for inspecting Church Fen for the report. Will try again in the next few days.
