

BRUNDALL BIODIVERSITY WORKING GROUP- CALL FOR ADDITIONAL SPECIALISTS

Brundall Biodiversity Working Group (BWG) was established in 2022 to assist Brundall Parish Council with implementing its Wildlife and Diversity Vision. BWG membership is made up of specialists with skills and experience in ecology, botany, environmental science, IT and conservation. Our main activities include investigating and documenting the biodiversity status of Brundall parish and identifying opportunities for managing and enhancing biodiversity. We also provide input and advice to Brundall Parish Council on biodiversity and related matters. The Working Group reports to the Council's Environment Committee.

BWG is currently seeking to recruit an additional volunteer member to participate in its varied programme of activities. We are particularly keen to hear from people with a background and experience in terrestrial ecology or a related field.

If you would like further information about BWG you can email us at brundallbiodiversity@gmail.com If you feel you may be able to contribute to our work, please get in touch by sending brief details of your experience to the address below.
