

Brundall Parish Council Land Management reports to be considered

Name of organisation/group: Church Fen Working Group

Date: September 2026

Highlights for sharing

Eastern footpath - Trial on improving muddy areas will be completed 19 October.

Bridge nearest the river - can be repaired for the time being by recycling planks from Boardwalk. Idea is that cost of replacing both bridges would be included in funding bids covering full church fen scheme.

Boardwalk

1. Peat depth being measured by Tim to ascertain the viability of using different routes.
2. Discussed possibility of joining eastern path & southern end of boardwalk by a new section across the fen.
3. TS to commence producing a route option document for LM in October/November meeting. Ultimately we are guided by what Broads Authority will permit.
4. Contractor instructed to collect boardwalk planks he didn't take away last month.

Tree overhanging river to be removed by contractor - subject to Land Management approval.

2 fires noted recently as well as ongoing rubbish issues.

Issues you wish Land Management to discuss
Awareness of current position & agreement of tree removal
Help requested from within Land Management groups
